

ARTISTIFY by Saish Shah

1. Introduction

1. Artistify is a website created for artists who want to showcase and sell their paintings and art stuffs. This website just acts as a medium to showcase the paintings. All the negotiation takes place between the customer and seller.

2. Design and Implementation

- This project is built using html, css, javascript, scss and bootstrap.
- The users can upload their artwork and view other artist's work in the gallery.
- Simple material website

3. Conclusions

- Ameliorated my knowledge about html, css, javascript, scss and bootstrap.
- More knowledge about react and other animation would have improved my website.
